Let's make an entrance

RKDOORSYSTEMS

Let's make an entrance

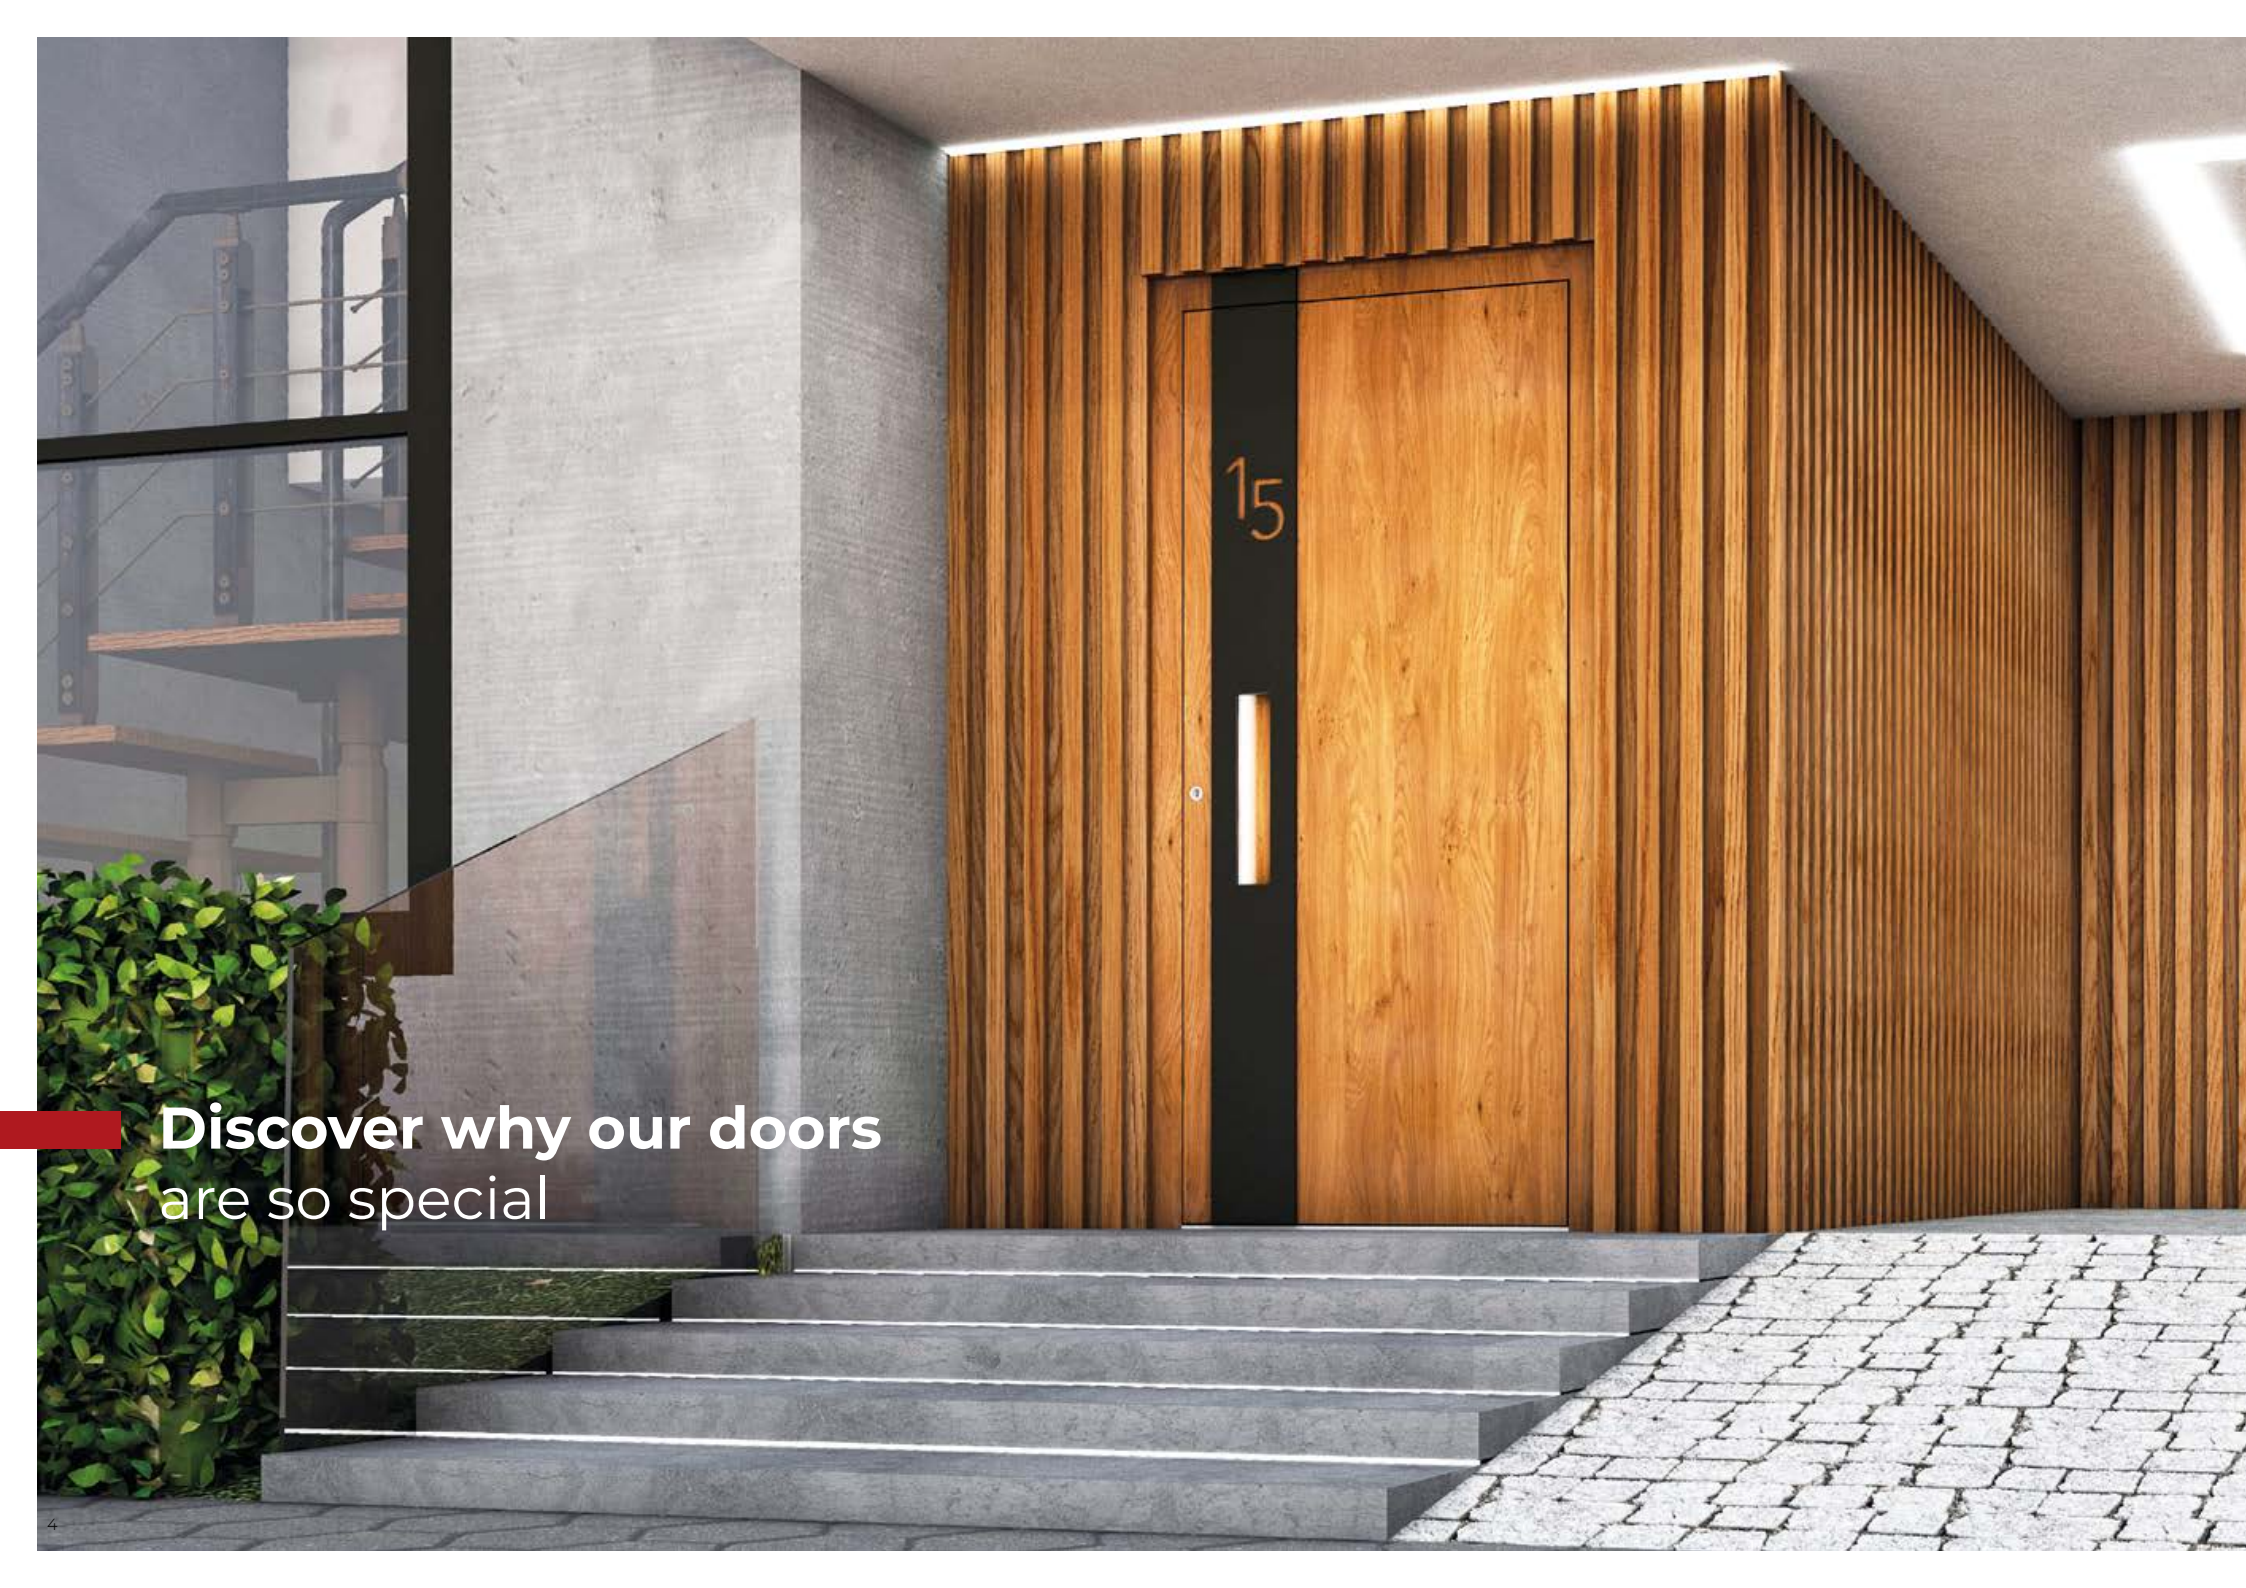

RK Door Systems is a family business that specialises in the fabrication and supply of highly insulated aluminium entrance doors that offer exceptional performance combined with contemporary designs.

Using precision German technology we have developed a selection of contemporary entrance doors that offer extremely low maintenance with wipe clean surfaces and through their rigid construction will not warp or bow.

Each design is available in a range of specifications and finishes and combined with their modern and unique designs they will make a stunning entrance to any building.

“Design is not just what it looks like and feels like. Design is how it works”

STEVE JOBS
Founder of Apple

**Discover why our doors
are so special**

Doors to make the **best first impression**

-  PAS24:2016 certified & Secured By Design accredited
-  10 Year Warranty
-  Fully flush profile internally and externally
-  Single frame construction (doors with sidelights and fanlights also constructed in one single frame)
-  Bespoke and flexible designs with hinged doors up 1300 x 3000mm high and pivot doors up to 2000 x 3500mm high
-  Pivot entrance doors available in any of our door designs
-  Vast range of colours and finishes including timber, ceramic and specialist metallic options
-  Amazing thermal performance with U values from 0.95 down to 0.67
-  Finger scan and smart home operation available
-  Laminated security glass as standard in triple and quadruple units
-  Extensive hardware options available including 180 degree concealed hinges and built in LED lighting
-  Hidden fixing system with concealed drainage and wipe down surfaces for low maintenance and clean look
-  Custom design service available to create a door unique to you
-  Five star Google reviews
-  Online door configurator to create your own door design

ENTRÉ RANGE

Offering exceptional value for money.

This selection of unique entrance doors offers style and performance and have been specifically designed to provide exceptional value for money. The doors comprise many of the same quality components as our Excellence range and have a flush interior and exterior. In addition, all Entre doors are Secured by Design Certified, European security level RC2 and RC3 and UK PAS 24 Certified, all of which delivers high levels of protection from unwanted intruders and the experienced burglar.

The overall specification of handle, locking system and colours have been carefully selected to maximise savings. Please contact us for further information and for details of matching sidelights, fanlights and optional extras.

Flush face to the interior and exterior

Entré Specification

	U-Value	0,90 W/m²K
	Glazing	59mm triple glazed
	Panel thickness	65mm
	Max size	1150 x 2250mm Special order up to 1300mm x 2400mm

EXCELLENCE RANGE

Limitless possibilities.

Our Excellence range offers some of the highest performing doors in Europe and we have an amazing collection of designs which are available in a range of specifications & finishes. All of our doors are handmade so you really can create a door that is unique to you.

Our online door designer allows you to create and view your new door and because our doors are handmade, we also offer a custom design service if you have a bespoke design in mind.

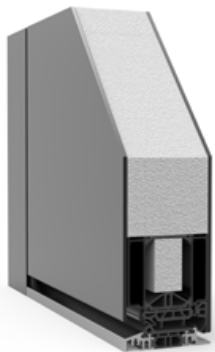

The doors have a flush interior and exterior and have PAS24:2016 & Secured By Design certification as standard as do all our doors.

Excellence Specification

	U-Value	0,72 W/m ² K
	Glazing	69mm triple glazed
	Panel thickness	75mm
	Sizes	Min: 800mm x 1900mm Max: 1150mm x 2250mm Special order up to 1300mm x 3000mm
	Security	Secured by Design PAS 24: 2016 RC2 & RC3
	Hinges	EES2400 180 degree fully concealed hinges available on request.
	Colours	16 standard colours, (any RAL colour, wood, ceramic, glass or special metal coatings available). Fine structure finish available.

You can upgrade your door, including colours and finishes, hinges, handles, smart entry systems, add sidelights and much more, contact us for more information and prices.

Flush face to the interior and exterior

PIVOT DOORS

The ultimate entrance.

This prestigious opening style is available for all our door designs, both standard and custom, with the added benefit of grand door sizes up to 2000mm wide x 3500mm high*, in a single panel. In addition, sidelights and fanlights are available within a single frame construction to create the ultimate entrance.

Our Pivot range use our Exclusive profile manufactured from premium German components and benefit from our hallmark flush door and frame construction system. These doors achieve a U Value of 0.72W/sq.mK and have full PAS 24:2016 and Secured by Design enhanced security certification as standard, offering high levels of protection from the elements and unwanted intruders.

Our pivot doors have been rigorously tested both in the UK and overseas and developed with the specific aim of providing the best performing pivot door on the market. Security, thermal efficiency and weather performance all being critical elements in the product design.

IMPRESS YOUR GUESTS

Pivot Specification

	U-Value	0,72 W/m²K

ES 2420
Door hinge (two-piece) RAL 9016 or EV1 silver

The heart of the door

Our exclusive profile boasts a 75mm fully flush frame and sash with a highly insulated aluminium panel which gives fantastic thermal performance and excellent security levels. Our aluminium is 3mm thick which allows us to be able to input grooves and flush stainless steel strips into the aluminium without compromising on quality.

- Low level, thermally broken access threshold (Disabled access compliant) 1
- High performance weather seal and connector 2
- Frame edge profile designed for concealed fixing strap system 3
- High performance insulated core 4
- 3mm thick aluminium outer face 5
- Warm edge insulated spacer bar 6
- Triple glass safety and low energy insulated glazing 7
- High performance insulated thermal break 8

Triple glazing - Ug – 0.7 W/m²K

ACCESSORIES

Automatic latchbolt

Simply allow the door to fall shut: as soon as the door is shut, the automatic latchbolts automatically throw 20mm and are secured to prevent them being forced back- the door is locked when just pulled shut. These locking systems can be opened at any time via the lever handle from the inside and by key from the outside.

Massive bolt (MR)

The GU-SECURY MR system provides you with a multi-point lock which is protected from being sawn through or forced back- with two or four MR bolts depending on the requirements.

Automatic double latchbolt

The particularly robust, self-locking system GU-SECURY Automatic 4 e.g. for house and apartment doors. Two MR bolts and two automatic latchbolts automatically throw 20mm when the door is pulled shut and are secured against being forced back.

The safe T-catch is easy and convenient to operate via the thumbturn

colours: EV1 silver, white, stainless steel

Safe T-catch activated from the inside

From the inside activated thumbturn can be deactivate outside using the key

Double bolt (DR)

The GU-SECURY DR multi- point lock rolls the benefits of the SH (Hook bolt) and MR bolt into one double bolt. The lock geometry allows the same frame locking elements used with the GU-SECURY Automatic 4 system (with Automatic double latchbolt) to be used.

GU-SECURY

GU-SECURY Automatic safety:

Just put the door shut - automatically without closing -so comes into force the multi-point lock with 20mm throw. Two latching deadbolts will be automatically bolt and blocked from being pushed back. Just today comes a major technical advance in the perfect safety features of entrance doors.

Do you want your front door to be freely accessible by day? The GU-SECURY Automatic TE system enables you to manually override the automatic locking function so the door is released during the day.

SECURE DOORS

Using the same German profile and components, all our doors are manufactured in the same purpose built factory and all our doors have PAS24: 2016 and Secured By Design accreditation as standard.

We know we have excellent products to shout about and Secured by Design provides us with a coveted endorsement from a security perspective and highly respected industry body. Unlike many companies, we wanted our entire suite, not just one or two doors or an item, to be accredited by Secured by Design to show our customers that all our doors are secure and that when we do something, we do it properly and thoroughly.

The importance of third party certification and testing.

Third party certification is where an independent body reviews the manufacturing process of a product and independently determines that the product manufactured complies with specific standards for safety, quality and performance.

PAS 24: 2016

PAS 24: 2016 – What is it?

PAS24: 2016 was produced by British Standards Institute (BSI) as a method of assessing the security performance requirements of external doors and window types. The levels and methods of attack experienced in the UK and associated with an opportunist burglar are specified. The burglary attempts covered by the standard are those which avoid noise and unnecessary risk. The time spent attempting to gain entry is limited to replicate the time pressures of an opportunist burglar.

- **Security hardware and cylinder test**
- **Manipulation test**
- **Manual attacks Infill manual test**
- **Infill mechanical load test**
- **Manual cutting test**
- **Mechanical loading test**
- **Manual check test**
- **Impact testing**

Secured by Design

Secured By Design – What is it?

Secured by Design is an initiative developed and owned by the Association of Chief Police Officers (ACPO). The purpose of SBD is to incorporate crime prevention into the design of fenestration products and new housing developments (Brooke, 2013). 91% of all crime recorded in 1987 was property related.

Secured By Design was created in 1989 the scheme is enforced by a team of around 200 Crime Prevention Design Advisers (CPDA) or Architectural Liaison Officer (ALOs) who operate and contribute to it on a daily basis.

SBD is split into two main sections. Part one is concerned with the aspects of external spaces on a building development such as lighting, parking and surveillance. Part two focuses on the security, weather performance, strength and the durability of the windows and door sets.

Secured by Design, does it work?

Research highlights that SBD housing developments suffer up to 75% less burglary when they are compared to a non SBD development; this is compelling evidence that following the SBD guidelines will cut down the damage and cost caused by such crime

Teedon et al (2009) findings of a new development in the Glasgow housing association show total house breaking crimes had decreased by 26% in the SBD area, and that attempted house breaking had decreased by 59%.

The requirements of Secured by Design

SBD specifies that windows and doors manufacturers applying for SBD membership must be certified against a certification scheme operated by a UKAS approved third party certification body, involving factory production control audits. The current SBD requirements are more stringent than ever before, with windows and doors subjected to the following regime.

- **Third Party Certification for fabricator.** A Factory production control (FPC) audit will be used to establish the initial and ongoing ability of the manufacturer to fabricate products covered by a WinMark certification Scheme.
- **PAS24:2012 Enhanced security testing**
- **BS 6375-1 Weather performance testing**
- **BS 6375-2 Strength and durability testing**
- **BS 6375-3 Additional performance characteristics testing**

ARCHITECTS RESOURCES

We all admire modern entrances and to assist Architects and other professionals specify our contemporary entrance doors, RK Door Systems are listed on the RIBA's product selector, NBS plus and NBS National BIM Library.

Our team can also advise on the most appropriate door system depending on the property or development, from residential to commercial.

Please feel free to contact us for more information.

RIBA Product Selector

For architects and construction professionals. Download brochures, detailed product specs, including NBSPlus and BIM specifications and more.

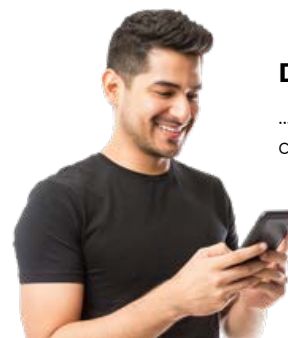

NBS National BIM Library

You can specify RK Door Systems in your plans. Browse our comprehensive NBS Product Specifications for information on all our door profiles and models.

NBS Plus Library

NBS specification products created by NBS for RK DOOR SYSTEMS LTD. Each product clause is authored in NBS format and is intended for inclusion in project specifications.

Design your door online

...with endless design possibilities, you can create your bespoke entrance...

The manufacturer reserve the right to introduce changes to product design and dimensions, as well as minor technological modification aimed at improvement of the door quality or functionality, without notice to the customer. Photos, dimensions and colours presented in the catalogue may differ insignificantly from the actual ones due to differences between printed version an the actual situation. The use of original colour chip charts rather than of the catalogue printout is recommended for selection of the colour or the sheathing material.

All the contents and graphics of this publication constitute property of RK Door Systems, and may not be copied or duplicated unless upon the owner's consent.
